

HARI SATYA NARASIMHA ANDEY

QA Automation Engineer | Selenium | Java | API Testing | Rest Assured | C#

📍 Hyderabad, India | ✉ Email: harisatyanarasimha@gmail.com

📞 Mobile: 9848756485 | 🔗 LinkedIn: <https://www.linkedin.com/in/harisatya/>

PROFESSIONAL SUMMARY

QA Automation Engineer with 4+ years of experience at Infosys specializing in Selenium WebDriver with Java and C#. Strong expertise in building automation frameworks using TestNG, JUnit, NUnit and Cucumber (BDD). Hands-on experience in API testing using RestAssured and Postman.

Improved regression efficiency by up to 40% through automation. Proven ability to independently design and deliver high-impact solutions, including building an AI evaluation framework using DeepEval for GenAI applications. Familiar with CI/CD pipelines (Jenkins) and version control using Git. Notice Period: 0 days | Available for immediate interviews.

TECHNICAL SKILLS

- Automation Testing: Selenium WebDriver, TestNG, JUnit, Cucumber (BDD), NUnit, POM, Framework Design, Data-Driven Testing
- Programming Languages: Java, C#, Python
- API Testing: Rest Assured, Postman
- Performance Testing: JMeter
- AI Testing / Tools: DeepEval (AI Evaluation Framework)
- Version Control: Git
- CI/CD: Jenkins
- Test Management & Defect Tracking: TFS
- Methodologies: Waterfall, Agile Scrum (Certified), STLC
- Testing Types: Automation, Manual, Regression, Smoke, Sanity, API

PROFESSIONAL EXPERIENCE

Infosys Ltd | Software Quality Engineer | 4 Years

Project: SPS

- Developed and executed 150+ automated test scripts using Selenium WebDriver with C#, increasing regression coverage by 60%
- Reduced regression cycle time by 35-40% through automation while ensuring timely delivery of high-quality releases
- Designed and maintained automation frameworks using Selenium with Java (TestNG, JUnit, Cucumber) and C# (NUnit)
- Performed API testing using Rest Assured and Postman, validating request/response and status codes
- Analyzed test failures and identified 100+ defects, improving application stability and reducing production issues
- Integrated automated test suites with Jenkins for scheduled and on-demand execution
- Used Git for version control in a Waterfall-based project environment

Key Highlight Project (AI / GenAI Work)

- Independently designed and developed an AI Evaluation Framework using DeepEval for a client's AI application
- Implemented validation checks for accuracy, relevance, consistency, and hallucination detection
- Reduced manual validation effort by 50-60% and improved reliability of AI outputs through automated evaluation
- Received direct client appreciation for ownership and innovation

KEY ACHIEVEMENTS

- Selected into the core project based on strong performance during Accelerate enablement
- Built and delivered a production-ready AI evaluation framework independently
- Received Client Appreciation and Exceptional Performance recognition
- Achieved Outstanding rating followed by Commendable rating in subsequent review cycle

EDUCATION

- Bachelor of Science (MPC) | Aditya Degree College | 2019 | CGPA: 8.2
- Intermediate (MPC) | Aditya Junior College | 2016 | 85.4%
- SSC | St. Mary's High School | 2014 | CGPA: 7.8

ADDITIONAL INFORMATION

- **Notice Period:** 0 days | Immediate Joiner
- Flexible with shifts and locations
- Strong learning mindset and adaptable to new technologies
